Your findings

Your scan was completed with the following findings discovered.

Listed below are your most recent findings, with the most severe listed first. To improve your threat score, prioritise these top issues.

Severity	Issue Type	Times found
LOW	Script Integrity Attribute Not Implemented	1

1 Script Integrity Attribute Not Implemented

Summary

What does this mean?

If the contents loaded from another domain is not verified the browser will execute the contents without verifying with a correct hash.

What can happen?

JavaScript files loaded from another domain should be verified using the integrity attribute.

This finding will often be relevant for several or all pages in a report. Since this can potentially generate a finding for very URL scanned, you might only see one finding to represent the global issue.
